

## Cornerstone 3.0.3 Release Notes

3.0.3 is a free upgrade for all Cornerstone 3 license holders that fixes issues uncovered since the release of 3.0.

See **Cornerstone 3.0 Release Notes** for more information on the new features and improvements introduced with 3.0.

3.0.3 runs on OS X 10.11 and later.

### Resolved Issues

- The source list and inspector produce visual artifacts when hidden on macOS 10.12.
- Cornerstone can sometimes display an error when selecting the HEAD revision after switching to the compare view from the log view.
- SSH multiplexing is now disabled after the changes made in 3.0.2 to enable multiplexing caused issues for some users.
- An error is displayed when “Show Differences” is selected for a folder in the log view.
- The revision picker in the cherry-picking merge strategy tab can sometimes show all revisions as checked.
- Revision popover for range field in cherry picking merge view is shown inverted.
